Event Information:

WELCOME TO @HACK 2025 @Hack is an annual cybersecurity hackathon taking place at Concordia University. This is an in-person event open to post-secondary students across Canada. Registration deadline is January 24, 2025. Hackathon Details Students will compete in teams to take on a series of cybersecurity-related challenges, ranging from hacking to AI to reverse engineering. The hackathon is in capture-the-flag (CTF) format. The top teams will win cash prizes! The hackathon spans 1.5 days over March 1-2, 2025. After Registration Once registration closes in January, all participants will receive an email asking you to verify that you can still attend @Hack - we know a lot can change between now and March! After we get this final verification that you're in, you'll be invited to the @Hack Discord server where you will create your team. Team Creation Although you will compete in teams of 2-4, each participant will register as an individual. If you have teammates in mind, make sure they also register on this page. You will create and finalize your team after you and your teammates have verified your registrations in January. If you don't have a team, you can link up with other individuals over the @Hack Discord. How to Hack Workshop We welcome all hackers (especially beginners) to attend our free "How to Hack" workshop in January to learn how a CTF hackathon works and get tips from the challenge developers themselves. More info on this workshop is coming soon! Questions? Email info@athackctf.com with any questions for the challenge organizers.
